

A food supplement with bovine colostrum and egg yolk.

The delicious tasting chewable way to enjoy 4Life Transfer Factor.

- ✓ The ideal option for people who have difficulty swallowing.
- ✓ Contains 200 mg of bovine colostrum and egg yolk per tablet.
- ✓ Citrus creme flavour, easy to carry and share.

The formulas of 4Life products are the result of the highest quality research and commitment.

INGREDIENTS RATING

★★★★★ Exceptional ingredients, backed by internationally approved research, are selected and studied.

RAW MATERIALS

4Life takes the utmost care in the sourcing and origin of its raw materials to ensure it obtains the choicest ingredients:

- It observes strict criteria in the selection of its raw materials (ingredients such as bovine colostrum and hen's eggs are of the highest quality).
- It carries out assessments and audits of its suppliers.

EXTRACTION

4Life selects the most effective extraction processes for its ingredients (ultrafiltration, nanofiltration) to obtain the smallest size of active molecules possible, so it can include the largest possible amount in each capsule.

4Life has patents for the extraction of transfer factors from bovine colostrum and yolk from hens' eggs.

FORMULA DESIGN

The final formula is designed with specific objectives tailored to each market.

Pilot tests involving physical and sensory assessments are carried out for each formula.

FACILITIES AND PROCESSES

We use state of the art manufacturing facilities. The 4Life production sites have obtained Good Manufacturing Practice (GMP) certification from NSF® International. This certification is proof that 4Life uses the right methods, equipment and quality control to ensure it produces the highest quality dietary supplements. 4Life carries out controls on every aspect of the process, from the selection of raw materials to packaging, guaranteeing products of the highest quality.

CONTAINS SUGAR AND SWEETENER

90 CHEWABLE TABLETS
