

Having a tough time training again
the next day?

Do you want to optimize your
strength training?

No time for a healthy breakfast?

Proteins are essential nutrients for the proper functioning of our body. They are the main component of our muscles but also have other important functions, for example, in our immune system.

WHAT PRO-TF CHOCOLATE OFFERS

The protein sources —i.e. whey and egg white protein— of PRO-TF chocolate provide a good balance of essential amino acids and 2.3 g of branched-chain amino acids (BCAAs) —i.e. isoleucine, leucine, and valine—.

Hydrolysed proteins are high-absorption proteins, which are easy to digest.

The low fat and sugar content of this product makes it compatible with diets for athletes and for weight control.

Food supplement with high quality hydrolysed proteins that contribute to the increase and maintenance of muscle mass

Supplement Facts	
Serving size: 19,5 g (1 scoop) • Scoops Per Container: 46	
Amount Per Scoop	
Calories:	70 kcal
