(7) From **milk** and **egg** yolk.

Did you know that...?

Glucose is the main source of energy in our body. The key for feeling well, having enough energy and good concentration is maintaining your blood sugar levels stable.

Having the right level of glucose in our body enables us to control our appetite and, therefore, our weight.

What does GluCoach offer?

- It contains nutrients that help to balance our glucose levels.
- Chromium helps to maintain **normal glucose levels** in the blood and the normal metabolism* of **macronutrients**.
- Vitamin C aids **normal energy** metabolism, helps reduce **tiredness and fatigue** and contributes to the normal functioning of the immune system.

* **Metabolism** is the name given to the chemical transformations that nutrients undergo in tissues, once the digestive and respective absorption processes are complete.
