calories**

**Delicious
taste**

**Easy to prepare
on the go**

**Tri-Factor²
Formula**

**4LIFE TRANSFER FACTOR™ TRI-FACTOR™
RIOVIDA STIX™**

(1) Contains grape and blueberry.

(2) Contains 600 mg of 4Life Transfer Factor Tri-Factor Formula per dose.

ANTIOXIDANT

Free radicals and antioxidants

What are free radicals and what causes them?

Living beings need oxygen to live, so they can get energy efficiently. Despite being necessary, oxygen can be toxic in high quantities as it produces highly reactive substances (free radicals). When excessive quantities of free radicals are produced, or when antioxidant defence systems fail, free radicals can react with cellular components and cause oxidative damage (to the skin, arteries, joints, etc). Certain factors increase the production of free radicals, such as smoking, pollution, stress, etc.

Antioxidants

The body has antioxidant defence systems to counteract the effect of free radicals. Certain vitamins, minerals and plant components also help protect cells from oxidative damage.
